Cindy *in* Cindy

Cinderella in CindyJS

Euclidean

Hyperbolic

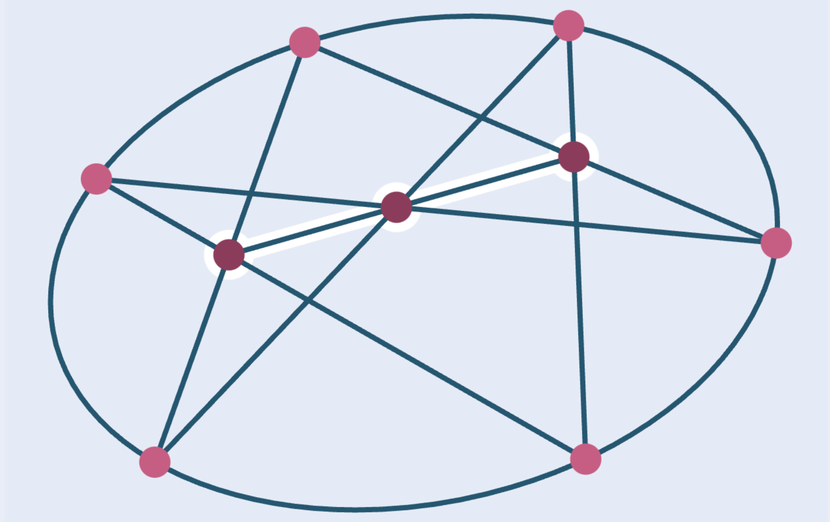

Tim Reinhardt,
Jürgen Richter-Gebert

What?

dynamic geometry program in the browser

fully projective and continuous

implemented in the mathematical visualization framework CindyJS

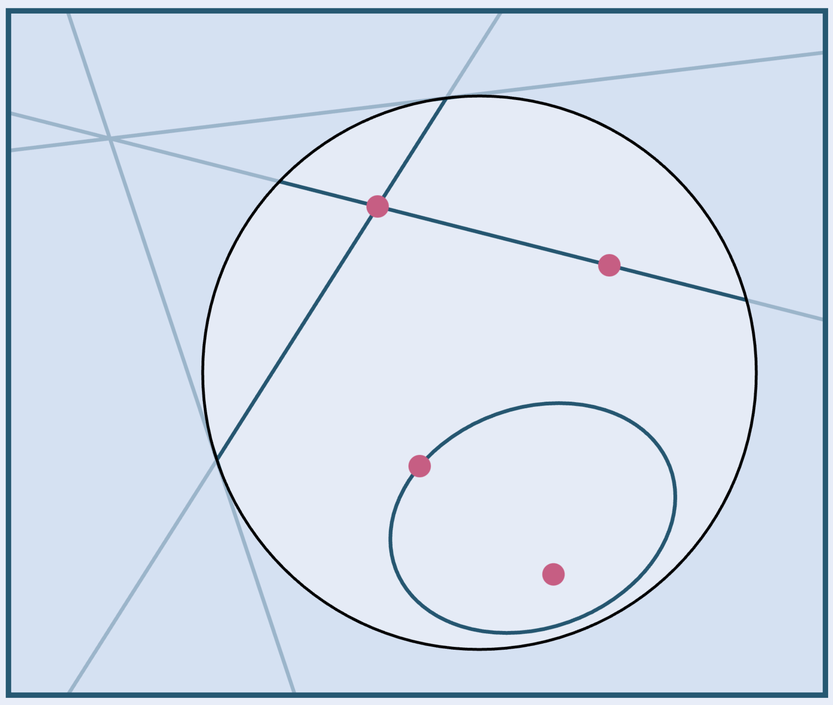

Create and Experience Geometry

Why?

creation of efficient data structures

development of reliable code base

resilience due to CindyJS

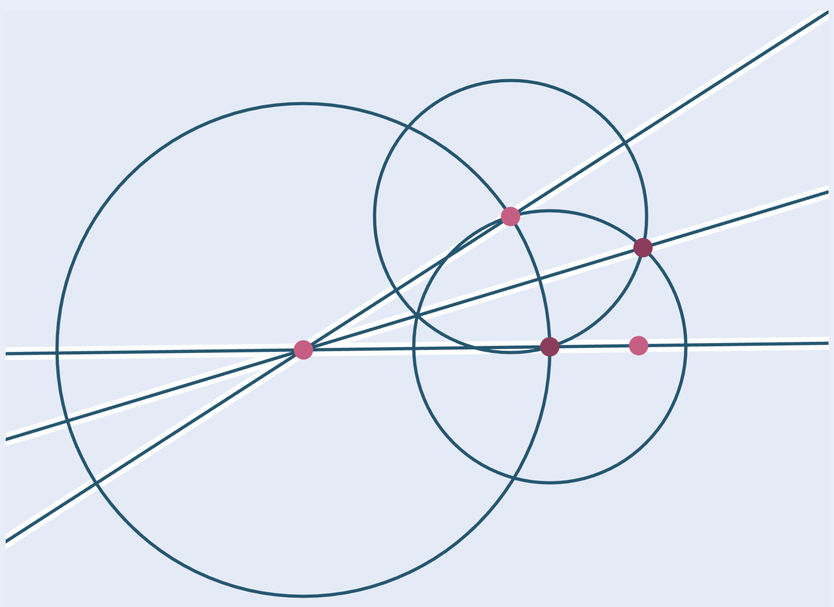

Explore, Teach and Conjecture

Mathematical Challenges

embedding in $\mathbb{CP}^2$ instead of $\mathbb{RP}^2$

tracing of elements and branches of logarithm

elegance and precision of computations

Dynamics and Continuity

Foundation

Cinderella

CindyJS
